“

*I first arrived at Regent House about 10 years ago and I had looked at several office locations but I knew immediately that Regent House felt 'right'. With the help of the on-site management team, I had a fully functioning UK office running within 48 hours. The location is also perfect; just off the main M60 motorway network and very close to the airport, important when you have an international business.*

*Michelle and Wendy are always ready to give a helping hand when needed and often go that extra mile... when you are a smaller operation; this kind of back up is often needed and much appreciated.*

”
